Examination	Degree/Certificate	Institute	Year	CPI/%
Graduation	B.Tech	Indian Institute of Technology Kanpur	2023-Present	**6.8**/10.0
Intermediate/+2	CBSE(XII)	Sarvodaya Bal Vidyalaya Rly Clny, New Delhi	2023	93.4%
Matriculation	CBSE(X)	GBSSS No.2 Rly Cly, New Delhi	2021	80.6%

Scholastic Achievements

- Cleared the **NISM-Series-VIII** certification examination conducted under **SEBI** regulations in **Equity Derivatives**.
- Secured **Top-10 at Strategy Storm, IIT Guwahati**, among **2,000+ participants**, through strategic analysis.

Work Experience

RamanIQ.ai *May'26 - Jul'26*
Software Developer Intern

- Built a **full-stack document platform** with **Next.js & FastAPI**, enabling structured document management.
- Designed a **modular service architecture** separating frontend, APIs, data processing, and persistence components.
- Modeled complex document hierarchies using **PostgreSQL & SQLAlchemy** with indexed and relational data structures.
- Developed reusable **REST APIs** powering document search, asset management, and seamless frontend-backend workflows.
- Automated **document ingestion workflows** for multi-format parsing, chunking, metadata extraction, and persistence.

Research Experience

IPO Price Dynamics in the Indian Market *May'26 - Aug'26*
Prof. Abhinava Triphati | Dept. of Management Sciences

- Studied **1,000+ Indian IPOs** through **underpricing, information-asymmetry, and price-discovery** frameworks.
- Reviewed **seminal IPO literature** and derived **empirical hypotheses** around demand, pricing, and investor behavior.
- Built an **IPO-level database** integrating price bands, **QIB/ NII/RII demand**, anchors, promoter stakes, and listing data.
- Automated **DRHP/RHP extraction** using **Python, OCR, NLP, PyMuPDF, and pdfplumber** to structure disclosures.
- Built **data-cleaning and feature-engineering workflows** for **underpricing, returns, and investor demand** analysis.

Skills

- **Languages:** C, C++, Java, Python, JavaScript, SQL
- **Frameworks:** React, Next.js, Node.js, FastAPI, REST APIs
- **Libraries:** NumPy, Pandas, Scikit-learn, TensorFlow, Keras
- **Data & Tools:** PostgreSQL, MySQL, MongoDB, Git, GitHub

Extracurricular Activities

- Led the institute **Ultimate Frisbee team as Captain**, securing 2nd Runner-Up at Udghosh'24.
- Led a **15-member team** and managed INR 60,000 budget as Coordinator of Ultimate Frisbee Club, IIT Kanpur.
- Organized **Ultimate Mania**, hosting 100+ participants across 15+ teams, driving end-to-end event execution.
- Established Ultimate Frisbee as a **recognized campus sport**, increasing club membership by **50%+**.
- Mentored **50+ students** through the club's first summer camp, coordinating structured sessions and participant engagement.

Position of Responsibility

Head, Udghosh'26 *May'26 - Present*
Annual Sport Fest — IIT Kanpur

- Spearheaded an 85+ member, **4-tier security team**, managing campus-wide deployment and **3 professional concert nights**.
- Coordinated with **Gymkhana, SIS, administration, and district authorities** for access control and crowd management.
- Oversaw security for **50+ events, social initiatives, and competitions**, ensuring seamless on-ground execution.
- Developed **security protocols** and **emergency procedures**, conducting drills to strengthen emergency preparedness.
- Created **media-ready press kits and promotional content**, coordinating **PR and media outreach** for festival.

Coordinator, Ultimate Frisbee Club *May'25 - May'26*
Games And Sports Council — IIT Kanpur

- Transformed the **Society into a Club**, managing an **INR 80k budget** and overseeing club operations and representation.
- Led the **Frisbee team as Captain**, organizing **3 intra-college tournaments** and driving **80%** participation growth.
- Initiated the Club's flagship inter-collegiate tournament, **IITK Invitationals**, securing **SBI as its inaugural sponsor**.
- Developed the Club's **official website** and built a **Frisbee simulation platform** for tactical analysis and team training.

Projects

Ultimate Frisbee Strategy Platform *Dec'25-Mar'26*
Self Project

- Conducted **user research** and mapped captain/player workflows to uncover **pain points and unmet needs**.
- Defined **MVP scope and priorities**, focusing on strategy creation, simulation, playback, browsing, and sharing.
- Converted user needs into **product requirements and workflows**, enhancing **functionality and usability**.
- Conducted **usability testing** and incorporated feedback to iteratively improve user workflows and **product experience**.
- Delivered a **real-time collaborative strategy platform**, enabling teams to **co-edit, simulate, and share strategies** with integrated **real-time chat**.

Mess Automation System *Jan'26-Apr'26*
CS253: Prof.Indranil Saha

- Designed an integrated platform addressing **attendance, meal booking, dues, and feedback** workflows.
- Developed **analytics dashboards** to track attendance, buying history, revenue, and support decisions on menu selection.
- Integrated **facial recognition**, booking, feedback, and financial workflows into a **scalable product**, streamlining operations.
- Delivered a platform supporting **500+ concurrent users**, ensuring reliable performance across core workflows.

Portfolio Management & Asset Pricing *Jun'25 - Jul'25*
Self Project

- Built a **portfolio optimization framework** combining **Fama -French and Black-Litterman** models for return forecasting.
- Automated **financial and sentiment analysis** using web-scraped data and **NLP** to support portfolio decisions.
